Countless glass Juliet balcony options from Balcony Systems

Balcony Systems, the UK's leading balustrading specialist, has added a Mirror-style Juliet and the renowned Balcony 2 (aerofoil) handrail to its existing cost-effective 70 mm handrail Juliet balcony system. Both the traditional 70mm handrail and Balcony 2 (aerofoil) handrail systems use a bracketed bottom rail that fits underneath the cill and are available in seven sizes from 1.28m to 2.84 m wide.

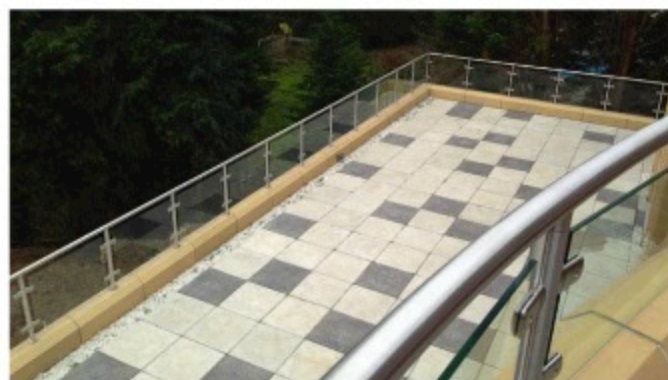

Available in six sizes from 1.28m to 2.45m, the Mirror Juliet uses a 70mm handrail on top and an inverted handrail on the bottom to give a neat, clean and perfectly-balanced external appearance.

NEACO stainless steel balustrade attracts another high-end specification

NEACO's Spectrum stainless steel balustrade is adding metallic sheen to a stunning bespoke residence built in Middleton St George, near Darlington, with an extensive balcony and sun terrace installation. Set within an outstanding scenic location overlooking the south bank of the River Tees, the seven bedroom detached home has been designed and built to an exceptional specification and the stainless steel version of NEACO's Spectrum modular system provides a suitably high aesthetic value for the project. Client Robert Maxey said: "I am absolutely delighted with the result of the NEACO specification. They have provided a first-class design and the resulting installation is faultless."
